2

Does your program have any areas that require improvement?

UNIVERSITY of WASHINGTON

3

Background

In 2017, new ACGME requirements address growing trends in the healthcare environment

- **Wellness:** Growing rates of physician burnout
- **QI:** pressure to provide higher quality care at lower costs
- **Many others!**

What is a Hackathon?

5

Process Map for Implementing a Hackathon

6

During Hackathon...

- > Assign teams
- > Set ground rules
- > Group work in teams
- > Teams pitch ideas
- > Voting

UNIVERSITY of WASHINGTON

7

The Perfect “Hack”

Innovative

Integrates into existing workflow

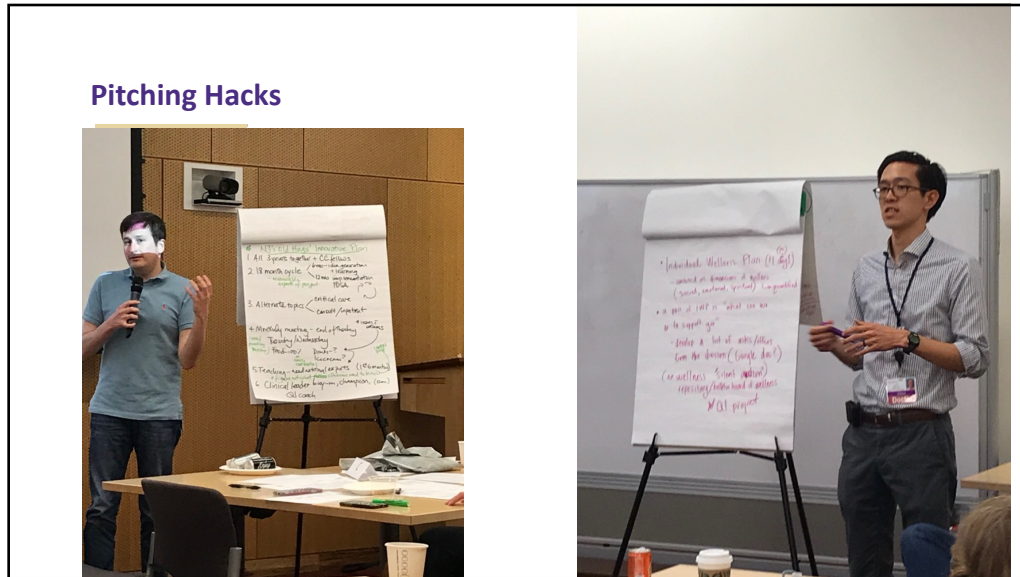

Measurable

Cost-neutral

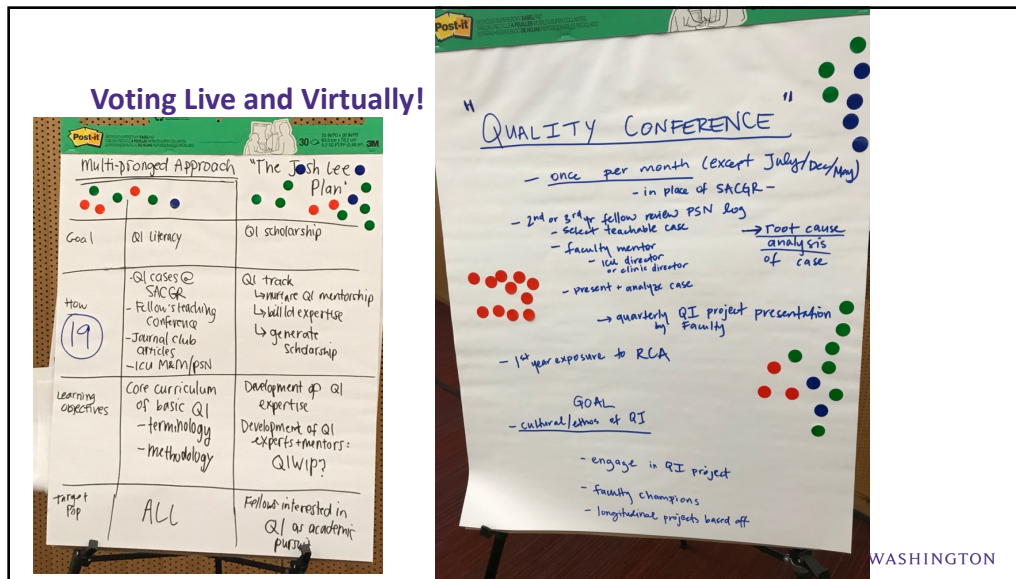

8

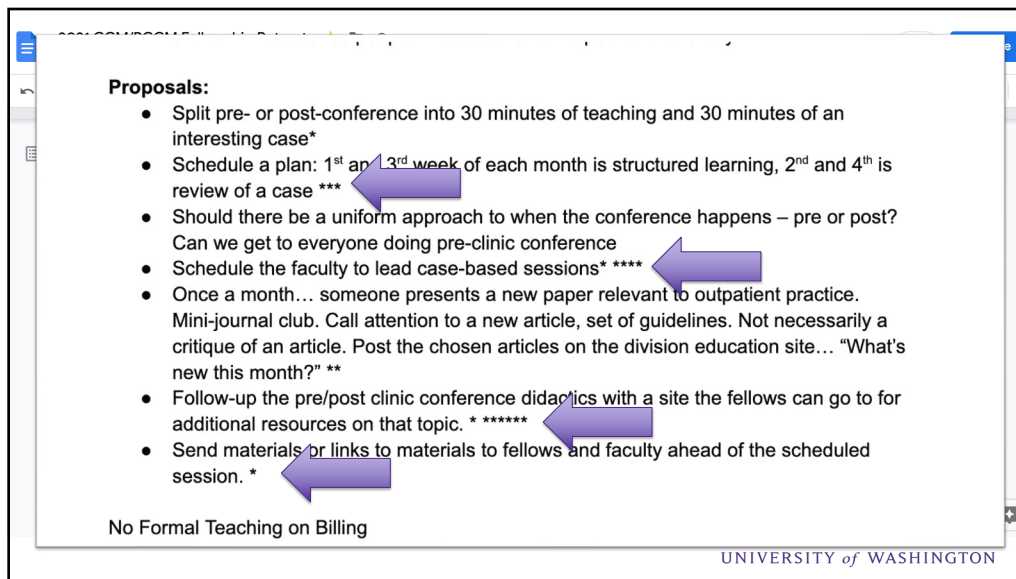

9

10

11

12

After Hackathon...

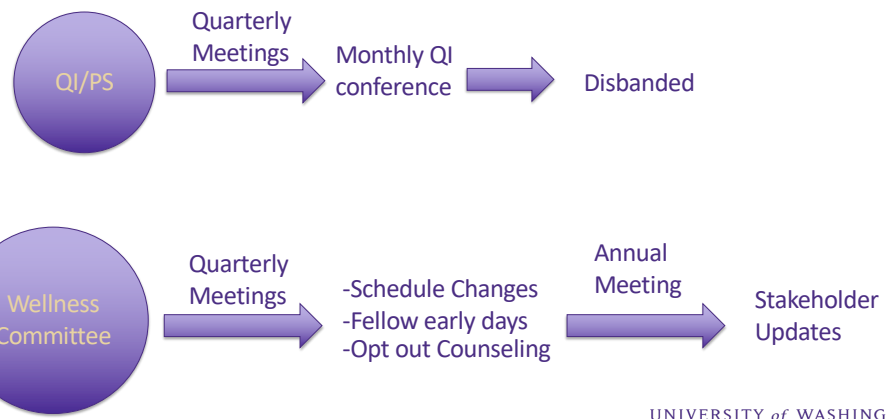

- > Develop action plan
- > Form workgroups
- > Measure progress
- > Report to participants

UNIVERSITY of WASHINGTON

13

Working groups do the work after the hackathon

UNIVERSITY of WASHINGTON

14

Hackathon allows for

- > Flexibility with narrow and wide-scoping problems
- > Crowd sourcing innovative solutions
- > Building community in your fellowship program
